Mobile Easykey fleet analysis
→ Reduce costs

Make potential savings visible.

Mobile Easykey analyses your vehicle fleet and shows specific optimisations for costs, usage and safety.

Fleet reduction up to 15%

Full transparency, measurable improvements

Reduce accident figures by up to 50%
→ Ensure operation

Accidents do not just happen – they are caused.

Mobile Easykey proactively protects people and machines and fulfils inspection obligations.

- √ **Access control:** only authorised drivers start machines
- √ **Crash sensors:** recognise, document and respond to events
- √ **Departure control:** digital & multilingual
- √ **Audit-proof**
- √ **In compliance with the law**

Fewer risks, protected employees, lower damage and repair costs

Efficiency, data protection & sustainability
→ Strengthen trust

No cloud. No compromises.

Mobile Easykey has been developed with data protection in mind. All information remains within the company.

- √ **No cloud:** all data remains within the company
- √ **GDPR-compliant, 6-fold data protection**

ESG & climate

- √ **CO_2 calculator** for reporting and optimisation
- √ Record emissions, avoid fines, promote sustainability

Customer testimonials

> "Costs for damage caused by violence reduced, safety significantly improved."
>
> *Rudolph Logistik Gruppe*

> "Now we have data instead of Excel speculation."
>
> *Sonepar Deutschland*

(Optionally expandable)

- AI-based personal protection (embedded AI camera, without video data)
- CO_2 calculator (ESG)
- Battery management including app (ELS scanner)
- Outdoor Locator (GPS)
- Finance & advanced statistics

NEW!

AI-based personal protection

Intelligent and secure

With the new embedded AI camera, we offer intelligent safety technology that recognises people, assesses distances and reacts in real time – for example, through light signals, or automatic speed reduction. And all this without video data and without data protection risks – simply safe, simply smart.

Biometric access control

for your forklift truck

Our solution for small fleets. Secure your machines quickly and easily. Biometric access control manages up to 120 fingerprints for secure vehicle access. Automatic ‚logout and departure control increase security.
