Certified safety

Our technology is tested and certified according to the latest standards!

- Compliance with ATEX-Directive 2014/34/EU
- Can be used in zone 1 (gas) 21 (dust)
- Marking according to ATEX: II 2 GD
- Marking according to IEC / CENELEC:
Ex d IIB T4 Gb / Ex t IIIB T1 35 °C Db IP6
(IIC T6 and IIIC T85 °C possible on request)
- Only operate with approved Mobile Easykey transponders!

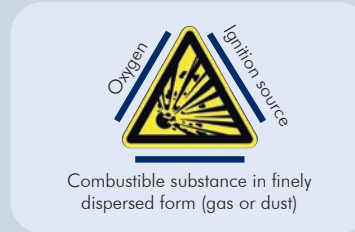

Premium Equipment

The explosion protection version combines all the advantages of the latest generation of Mobile Easykey modules with the safety equipment necessary for explosion protection operations:

- Access control
- Digital, dual Crash Sensor, which detects the conditions in operation during a „learning trip“ and is thus perfectly adapted to the respective operating conditions
- Extensive analysis options for optimising the vehicle fleet
- And all other advantages of the manufacturer-independent system!
