easykey®

More security, lower costs – get to know your fleet

# This is Mobile Easykey

Europe's  
**#1**

VDI interface  
ready

## The number 1 in fleet management

Mobile Easykey is a manufacturer-independent, modular fleet management system for industrial trucks and machines of all kinds. The basis of the system forms the RFID access control only for authorised operators via RFID transponder. Furthermore, Mobile Easykey offers a variety of options for efficiently controlling and optimising the fleet. The introduction of Mobile Easykey in the company leads directly to a prudent driving style and thus to a considerable reduction in violent damage to vehicles and peripherals. Mobile Easykey proactively increases security in the company.

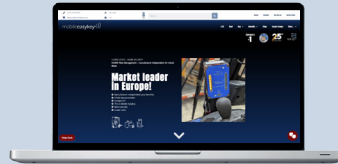

## The most important features

- RFID Access authorisation
- Patented crash sensors
- Departure control
- Comprehensive fleet management software
- Statistics and efficiency analyses
- User Management (e.g. driving authorisations, instructions, G25)
- Vehicle Management (e.g. UUV, maintenance planning, leasing monitoring)
- Data transmission: WLAN, Bluetooth, cellular
- Smartphone App
- Extensive accessories, e.g. Load Sensor and Battery Tool 2
- Special versions also for cold stores and explosion protection areas

## More Information

A lot of detailed information: Videos, Wiki, Help Desk, Downloads, Job Reports, 24/7 webinars and much more!  
[mobileeasykey.com](http://mobileeasykey.com)

## The most important benefits

- Manufacturer-independent
- Rapidly falling accident figures
- Lower costs for violent damage
- Determination of the actual number of devices required
- GDPR-compliant – 6-fold data protection and the data stays with you!
- Compliance with all legal requirements
- Easy to implement
- Sustainable reduction of resource and CO2 consumption, e.g., through fleet reduction
- Buy or rent (easy DaaS!)
- Software maintenance contract optional
- High level of service competence, e.g., by the „Digital Office“: Support, Training, Webinars
- Freely available „Wiki“ with lots of technical information and documentation
